## Guidance on paediatric submissions

Via Syncplicity Web Client

### Disclaimer:

The following guidance outlines the main steps to take to prepare for submission, and a list of documents required for the **main**<sup>1</sup> types of paediatric submissions.

This document should be read in conjunction with other relevant guidance on content available on the EMA website, such as the [European Commission Guideline on the Format and Content of PIP applications](#); [Paediatric Medicines](#); [Paediatric investigation plans: questions and answers](#); and the [Paediatric Regulation](#).

<sup>1</sup> If you need further guidance on any other procedure type/category not listed, please contact us via [ASK EMA](#).

# 1. Outline of paediatric submission steps<sup>2</sup>

1.1. **In advance** of your targeted [submission deadline](#) please ensure access to:

- [Syncplicity Web Client](#) ([register](#) if not yet done)

*Important: Using one of these submission channels is required for all applicants and all types of [paediatric submissions](#).*

- [EudraLink](#) ([instructions](#) to open an EudraLink account).

## Research Product Identifier (RPI)

An RPI number is required for paediatric procedures.

- If your product does not yet have an RPI, please consult the [IRIS guide to registration](#) (8.1. *What to do if I am sure that an RPI already exists, but I cannot see it in my RPI list in IRIS?* and 8.2. *How to request a new RPI*), and request an RPI via the [EMA IRIS system](#).
- The RPI number should be included in the appropriate field upon creation of the XML delivery file in the [Delivery file UI](#) and also included in the electronic application form.

1.2. For your submission, please use the latest versions of [templates and forms](#), observing the drafting notes provided.

The forms and templates should be downloaded and saved before being completed, using for example “Save target as” function as illustrated on the following screenshot:

Where established, please name your documents as per the [paediatric submission naming convention](#).

1.3. Upon [submission](#), please follow the [instructions](#) for the **Paediatric submission** to create an XML delivery file, selecting the [relevant options](#)<sup>1</sup>.

[Submit](#) all the [required documents/ZIP files](#) in a **single folder** (as paediatric submissions do not follow eCTD standards) via the Syncplicity Web Client.

1.4. Following your submission, within 5 working days after the relevant submission deadline at the latest, you will receive an acknowledgement of your submission via EudraLink that will contain a full [paediatric procedure number](#) to be used in any further correspondence about this procedure.

*Important: If you have not received this EudraLink message from EMA, and it has been more than 5 working days since the submission deadline, please contact us via [ASK EMA](#) as your submission may have not reached us.*

---

<sup>2</sup> A letter of intent to submit a paediatric application is no longer required or processed, with the exception of submissions where an expedited review is foreseen, as detailed on the EMA website (e.g. [COVID-19 related submissions](#)).

## 2. List of required documents by procedure type

### 2.1. Paediatric investigation plan (PIP) and product specific waiver submissions

To contain:

- [Electronic form for paediatric-investigation-plan application and request for waiver - \(PED1\) certified](#) ('Part A')

#### **Note on Part A:**

Part A must be submitted as an electronically-signed<sup>3</sup> **active** PDF form (containing active fields), i.e. **not** flattened, printed or a scanned PDF. If this technical requirement cannot be met, then two files are required:

- one (unsigned) completed PDF form containing the active/live fields; and
- one scanned copy of the completed PDF with wet signature.

For mandatory RPI number see section 1.1 of this guidance.

- [Key elements form: Applicant's proposal for a paediatric-investigation-plan opinion](#) (PDF form to be used until 11 September 2023)
- [Key elements form: Applicant's proposal for a paediatric-investigation-plan opinion](#) (new) (Word form to be used from 12 September 2023)

Note on KEF:

- The key elements form should be used to propose key elements in short bullet-point style for all completed, ongoing and proposed future steps in the pharmaceutical development for children, including quality, non-clinical and clinical, modelling and simulation and extrapolation studies which are proposed for inclusion in the PDCO's opinion.
- It must not include background information, explanations, justifications, legal requirements (e.g. consent) or additional detailed information (Scientific document, Parts B-F, is to be used for such information).

- [Template for scientific document \(Parts B-F\)](#)

Note:

- This document must be submitted in **Word** format. Cross-references and hyperlinks in the text should be avoided.
- The *drafting notes in the template* and the are intended to guide completion.
- Copy of literature references, as a single zip file.
- Letter authorising the person appointed in Form Part A, section A.1, to communicate with EMA regarding this paediatric procedure on behalf of the applicant.
- Other supporting information (as listed in Form Part A, section A.10), as a single zip file, if applicable/available, e.g.:
  - scientific advice CHMP/NCA/third countries/FDA written requests;
  - risk management plan;

---

<sup>3</sup> Further information on e-signatures: at <http://esubmission.ema.europa.eu/eSignatures.html>

- summary of product characteristics;
- investigator’s brochure;
- copy of the Commission decision on Orphan designation.

## **2.2. Answers to PDCO requests for modification (RfM) (resubmission following clock-stop)**

To contain:

- Response document to the PDCO request for modification, including a list of references used in the response, in Word format.
- Copies of additional references used in the response, in a single zip file (previously sent references should not be included).
- Additional relevant documents to support the response that were not previously sent.
- **Only in case of changes to the previously submitted documents:**
  - [Key elements form: Applicant’s proposal for a paediatric-investigation-plan opinion](#) (PDF form to be used until 11 September 2023)
  - [Key elements form: Applicant’s proposal for a paediatric-investigation-plan opinion](#) (new) (Word form to be used from 12 September 2023)

(See also [Note on KEF](#))

- [Electronic form for paediatric-investigation-plan application and request for waiver – \(PED1\) certified](#), see also [Note on Part A](#).

*For mandatory RPI number see section 1.1 of this guidance.*

- Letter authorising a new contact person appointed in updated Form Part A, section A.1, to communicate with EMA regarding this paediatric procedure on behalf of the applicant.

*Note:*

*An updated scientific document (Parts B-F) is **not** required and therefore should not be submitted. All answers including rationale must be provided in the response to the PDCO’s request for modification document.*

## **2.3. Modification of an agreed PIP**

To contain:

- [Electronic form for paediatric-investigation-plan application and request for waiver – \(PED1\) certified](#)

*Note (see also [Note on Part A](#)):*

*Avoid reusing the Form Part A submitted for the initial PIP procedure. Information provided in all sections must be up-to-date, including the current product’s marketing authorisation status. Unless subject of this modification, pharmaceutical form, route of administration, condition and active substance (except if INN has been recommended meanwhile), should be in line with the EMA decision of the preceding procedure.*

*For mandatory RPI number see section 1.1 of this guidance.*

- [Request for modification of an agreed paediatric investigation plan](#) template, listing **all** requested changes, in Word format.
- Copies of literature references used in the request, as a single zip file.

- Other supporting documents, as a single zip file.
- Letter authorising the person appointed in Form Part A, section A.1 to communicate with EMA regarding this paediatric procedure on behalf of the applicant.
- Document “Decision with annexes” issued in the preceding procedure that is now being modified.
- **Only for any new** study that is being proposed in this modification procedure:
  - [Key elements form: Applicant’s proposal for a paediatric-investigation-plan opinion](#) (PDF form to be used until 11 September 2023)
  - [Key elements form: Applicant’s proposal for a paediatric-investigation-plan opinion](#) (new) (Word form to be used from 12 September 2023)

(See also [Note on KEF](#))

*Note:*

*An updated scientific document (Parts B-F) is **not** required and therefore should not be submitted. All proposed modifications to the agreed PIP and rationale/justification should be listed in the [Request for modification of an agreed paediatric investigation plan](#) template.*

## 2.4. Compliance check request

To contain:

- [Request for compliance check on an agreed paediatric-investigation-plan form – \(PED3\) certified.](#)

*Note:*

- *All sections should be up-to-date and in line with the EMA decision of the procedure that is being checked for compliance, incl.: name of the active substance (unless INN has been recommended meanwhile), pharmaceutical form, route of administration and condition and measures and timelines **to be checked**.*
- *Each key element of each study that is to be checked for a compliance is to be entered as a **separate** measure in the compliance check form using “Add measure”, see arrow and drafting notes on the following **example**:*

**Clinical measures (currently 13 measures)**

Terms of the decision on the PIP (Including measure and time lines as detailed in the annex to the decision)
Study population and subset definition (in PDCO opinion, Annex I, Study table, left hand column)
<Add the agreed measure by inserting the exact wording as per the preceding EMA decision> (in PDCO opinion, Annex I, Study table, right hand column)
Applicant's position/justification on fulfilment of the measures and time lines
<Add your justification e.g.: fulfilled, not applicable or explanation>
Location in dossier
<Add exact location of the data in the dossier including name of the report and page number>
Clinical measure # 1
Remove this measure

- Letter authorising the person appointed in the Request for compliance check form to communicate with EMA regarding this paediatric procedure on behalf of the applicant.
- Document “<EMA-xxxxxx-PIPxx-yy-<Mxx>> Decision with annexes” issued in the procedure that is being checked for compliance.
- Study report(s)

**Note:**

*Full (complete) study reports should be submitted for the compliance check. If not yet issued, the latest available report or a similar document may be submitted, which must contain sufficient information to allow the check of compliance against the agreed key elements in the decision. In such cases, discussion of the suitability of the available report with the paediatric coordinator is recommended prior to submission of the compliance check. Individual patient data listings (section 16.4) are not required.*

**Only if available / applicable:**

- Summary of product characteristics (SmPC).
- Evidence of study initiation.

**Note:**

*When initiation of a clinical study is not deferred, the applicant should submit a signed and dated declaration from the principal investigator certifying that at least one participant has been included in the study/trial (i.e. specifying the date of signature of the informed consent).*

- Quality measures (e.g. age-appropriate formulation).

### 3. Naming Convention

Note: Wherever the naming convention is **not** established in the following table, the document included in your submission should be named to reflect its content, starting with the [procedure number](#) (where available), and observing the usual rules on naming documents such as avoiding symbols.

## Explanatory notes on paediatric XML delivery file fields completion:

---

<sup>j</sup> Submission of more than one **Submission-Unit** in a single submission is possible if it is for **the same procedure**; the Submission-Unit listed first in the above table should be selected, e.g. if you are submitting a validation response and wish to notify us of a contact change at the same time, select "Validation response" as the Submission-Unit.

<sup>k</sup> **Paediatric procedure number** is assigned by EMA upon receipt of your paediatric (pre-)submission, and communicated to you in an acknowledgement email via EudraLink. The number is also to be found on all procedural documents (EMA decision, PDCO opinion, Summary report) and formal communications sent to the applicant via EudraLink in one of the following formats ("x" denotes a number, "yy" denotes PIP/waiver year of submission):

- EMEA-xxxxxx – a temporary core number – use if available when the complete paediatric procedure number has not yet been issued by EMA, i.e. for Submission-Units: "Pre-submission interaction" and "Submission (application)" unless there was a Pre-submission interaction.

The 6-digits "xxxxxx" will be identical for any of your subsequent submissions for the same active substance, e.g. 2<sup>nd</sup> PIP/waiver, modification of an agreed PIP, compliance check.

Complete paediatric number - use in all other Submission-Units, in a format relevant to the Procedure Type:

- EMEA-xxxxxx-PIPxx-yy for PIP and waiver
- EMEA-xxxxxx-PIPxx-yy-Mxx for modification of an agreed PIP
- EMEA-C<x>-xxxxxx-PIPxx-yy<-Mxx> for full or partial/interim compliance check.

<sup>l</sup> **Active substance** is a mandatory field, to be completed consistently throughout your submission as either:

- [Recommended INN](#),
- [EU Pharmacopoeia name](#),
- common name, or
- the exact scientific/chemical name,

in this descending order of preference.

For accelerated procedures (as described on the EMA website), in front of the active substance please add the reason, e.g. "COVID-19".

In any subsequent submissions (e.g. modification of an agreed PIP and compliance check) it should match the active substance in the preceding EMA decision unless e.g. an INN has since been recommended.

<sup>m</sup> **RPI**: see section 1.1 of this guidance.
